From Al Fluman (EMI):

Not all emergency response personnel need to take IS-800. Basically we are recommending the following:

*All Federal, state, territorial, tribal, and local emergency managers or personnel **whose primary responsibility is emergency management** must complete this training.*

*Who should take IS-800 in FY 2006?* As stated above all Federal, state, territorial, tribal, and local emergency managers or personnel whose primary responsibility is emergency management must complete this training. Included below are additional guidelines to assist you in determining the type of individual by position who should take the IS-800 training.

Federal Level – Officials in Federal government departments and agencies with emergency management responsibilities under the NRP.

State/Territorial Level – Officials in state and territorial governments with emergency management responsibilities to include personnel from state and territorial emergency management agencies and from agencies who support and interact with the 15 Emergency Support Functions (ESF) in the NRP.

Tribal/Local Level – Officials in tribal and local jurisdictions with overall emergency management responsibilities as dictated by law or ordinance; those officials with overall emergency management responsibilities through delegation; and those officials primarily involved in emergency planning.

There is updated FY-06 NIMS Training guidance document along with an updated NIMS National Standard Curriculum Development Training Guidance on the NIC website. I have attached both of these documents to this email.
